Smart Speaker

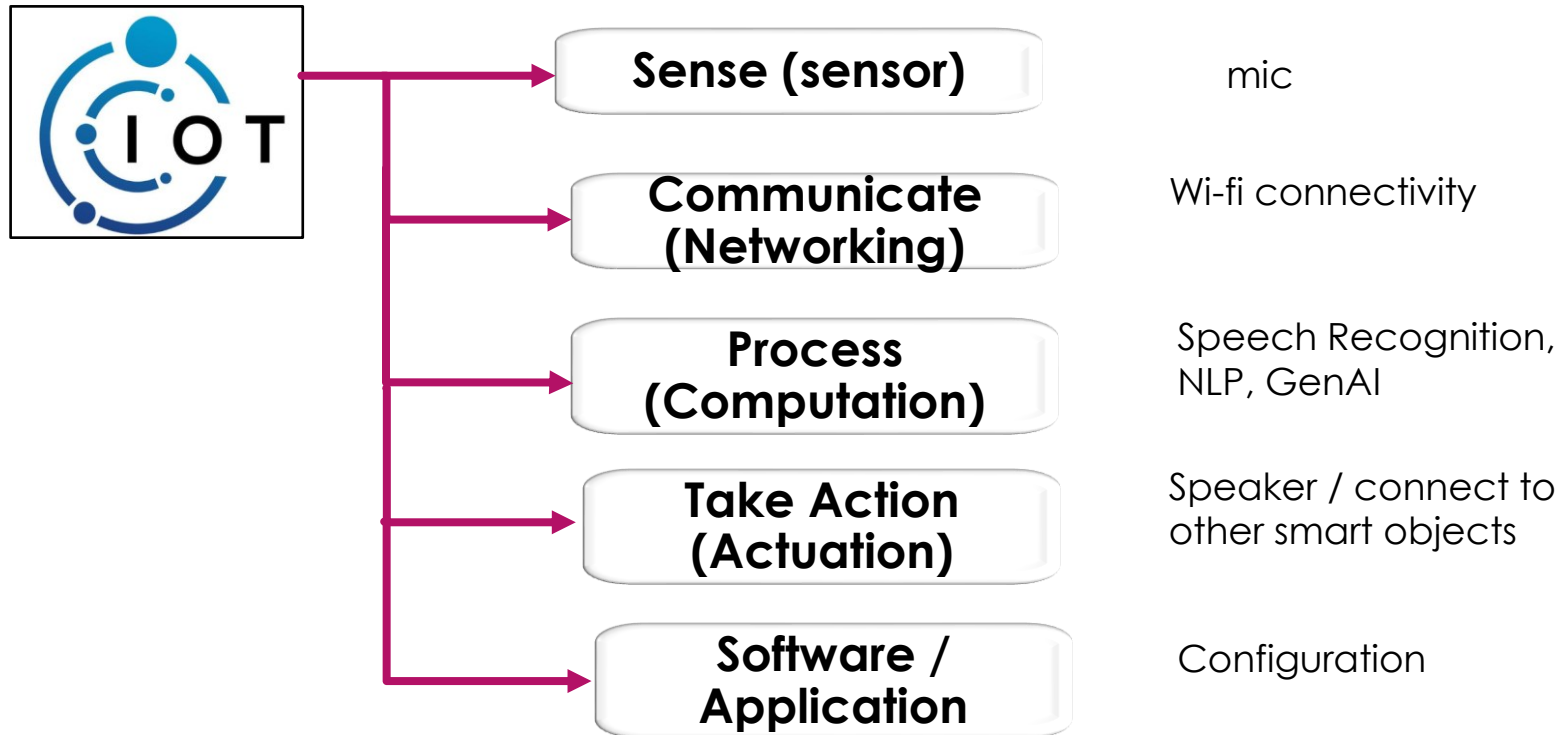

# What is IoT ?

## Use case : Smart Building – Fire Management System

# What is IoT ?

Use case : Asset Tracking across Supply Chain

Asset goes through multiple agencies and departments

Tracking indoor

Remote monitoring & control of assets, Driver Behaviour, Truck speed etc.

Chain of custody

Product status / Health

# IoT Basic Architectural Components

## Data Collection

- Sensors
- GPS
- RFID enable , BLE Beacon
- Temperature

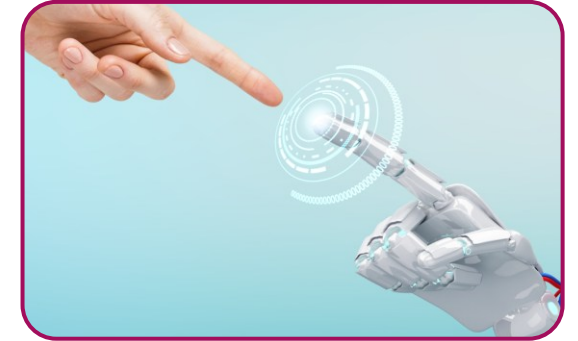

## Communication

- Networks
- LAN
- WAN
- PAN - BLE

## Command Centre

- Data Management
- Data Analytics
- Application

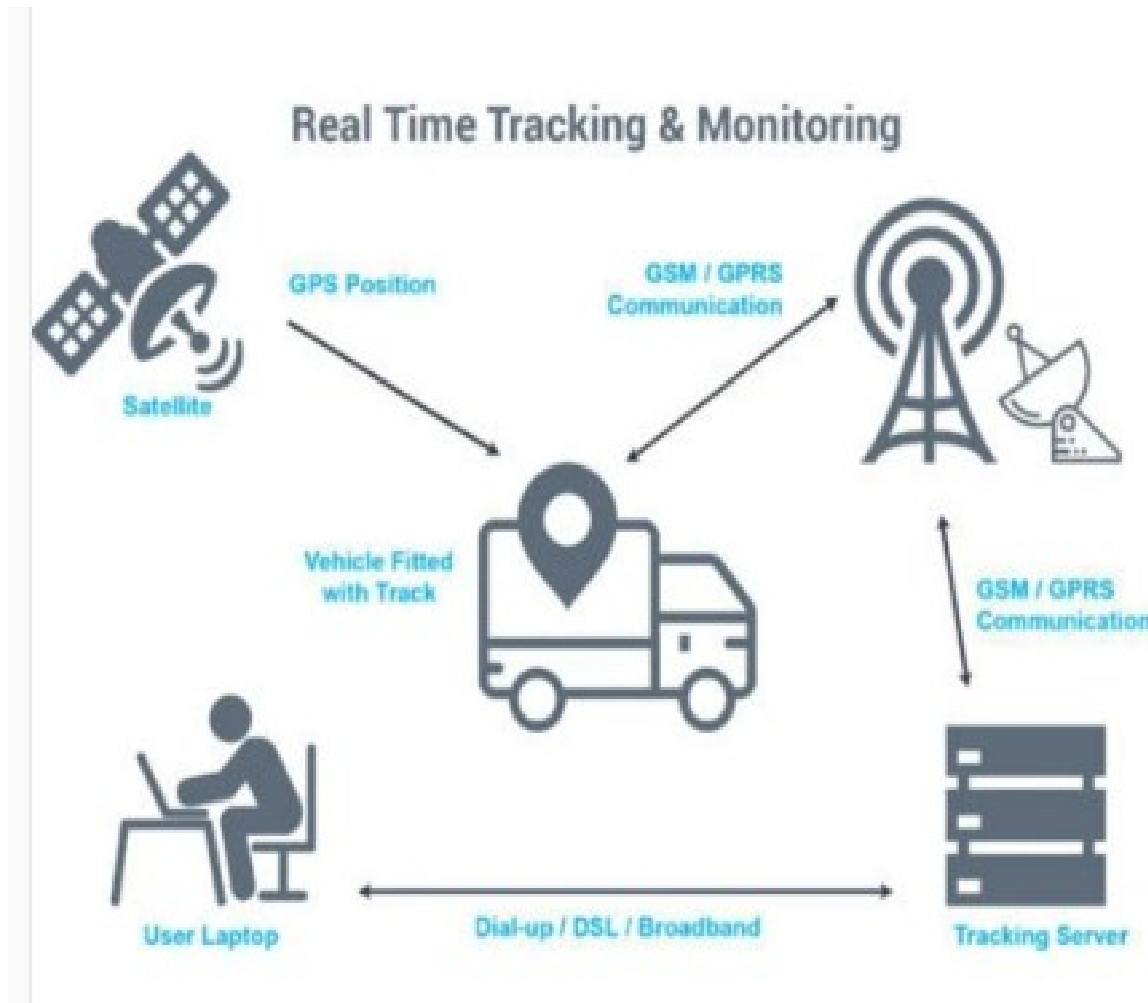

## Actuation

- Door Lock (for remote control),
- Buzzer
- Motors
- Remote control devices

# What is IoT ?

## Use case : Smart Asset Tracking across Supply Chain

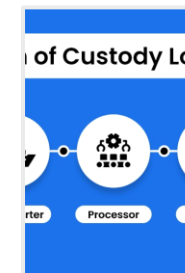

### Realtime tracking

- Indoor or outdoor
- location, condition, and performance

### Inventory management & Control

- Feed details into supply chain
- Remote Control
- Alerts and notifications

### Chain of custody

- Complete Trace of the asset handling

# IoT Basic Architecture
